*EnSiteUSA's comprehensive land services division
is engaged in projects across the country.*

EnSiteUSA Services

Immediate and responsive services for transmission, midstream and distribution companies.

Quality & Safety

Having successfully worked nearly two million consecutive hours injury free, EnSiteUSA has been recognized by the energy industry and the Governor's Safety Council as being dedicated to providing safe and healthful operations.

Construction Management & Inspection

EnSiteUSA's construction management and inspection services are provided by EnSite Quality Control (EnSiteQC), an affiliate of EnSiteUSA. All inspection personnel conform to client specific DOT Operator Qualification (OQ) requirements through OSHA, Veriforce, NCCER, MEA and other accredited OQ programs. EnSiteUSA complies with all DOT PHMSA drug and alcohol testing requirements and is a member of ISNetworld.

Land & Right of Way Services

EnSiteUSA provides professional-quality, value-added land and right of way services to our clients so their facilities are legally located to the satisfaction of all parties. We are engaged in projects across the United States, providing services for all stages of pipeline projects, including feasibility studies, site negotiations and acquisitions, construction support and damage negotiations.

Procurement & Material Control Services

EnSiteUSA provides a full range of procurement and material control services tailored to the specific needs of our clients.

Project Management, Controls & Planning Services

EnSiteUSA's project management services include conceptual planning, design, construction and placement of the facility in service.

Our project control functions include budget preparation for the entire scope of a given project, planning for the required versus available resources, and regular reporting of project progress in relation to the project plan.

We also offer planning and feasibility studies for every stage of a project.

Engineering & Design / Drafting Services

We maintain our commitment to sound, professional engineering services through compliance with all applicable regulations, industry standards and codes. Our accurate, complete and thorough design and drafting services minimize construction errors and cost overruns to benefit a project's bottom line.

Survey & GIS Services

Using our staff of registered professional land surveyors (RPLS) and technical specialists, along with the latest GPS technology, EnSiteUSA offers a complete array of innovative, cost-effective surveying solutions across the U.S. Our extensive experience with the development, maintenance and expansion of geographic information systems (GIS) sets us apart from our competitors.

System Operations & Maintenance Services

EnSiteUSA provides system operations assistance and maintenance services from start up through contract operations.

EnSiteUSA provides a full suite of pipeline management services, from conceptual planning to start-up and operations.
